

Play it Safe!™

Second Grade Script Preview

Always tell a trusted adult, like the ones we mentioned earlier.

What if you told someone and the person didn't believe you? Should you be quiet or keep telling? (Keep telling) That's right. You should keep telling until someone you tell believes and helps you.

I have something important to say now so I want you to listen carefully. If anyone touches you on your private parts or asks you to touch their private parts for no reason, it is not your fault.
